hese ideas: nightmares

Nightmares!

There will be blood...

Live or die, make your choice

Society would call you an informant, a rat, a snitch
I call you unworthy of the boy you posses,
of the life that you've been given
Now we will see if you are willing to look inward, rather
than outward...
To give up the one thing you rely on in order to go on
living

The device around your neck is a death mask
The mask is on a string timer
If you do not locate the key in time, the mask will close
Think of it like a Venus Flytrap
What you're looking at right now is your own body!
