Swallow purple terror candy

Don't forget to breathe

Seekin by the wanting

Drawing from the need

This dichromatic vision

Of one who does not care

To sippin' cocktail sedatives

Two months to hide somewhere

Butterflies butterflies

Cut the stomach out and hang it over

Butterflies butterflies

My heart will be the bridge that u walk over

The wolf has caught the chicken

Now I feel unsteady

Emotions in the blink again

So kick me when you're ready

Here lies a violet coffin

The dead of my control

Along with all my skeletons

They put me in the hole

Butterflies butterflies

Cut the stomach out and hang it over
Butterflies butterflies
My heart will be the bridge that u walk over
Sickened by the notion
I give myself again
Chokin on the bullet
The gun has found a friend
So raise your glass to sorrow
And drink to all the pain
Tie a silver ribbon round
The poieces that remain
Butterflied butterflies
Cut the stomach out and hang it over
Butteflies butterflies
My heart will be the bridge that u walk over
That u walk over
That u walk over
