I wish we could  
I wish we could  
I wish we  
I wish we

You know it's so unfair  
This life sometimes  
When it never lets me fulfill  
The deepest desire I have inside  
If we could disappear  
And fly away to a paradise  
A place where only you and I  
To unleash this fantasy

Then I could love you every night  
Hold you until the morning light  
No one to say what's wrong or right  
The way it has to be

Wish I could love you every night  
Hold you until the morning light  
No one to say what's wrong or right  
Oh how I wish, I wish we could be free

I'm living through this heart of mine  
But I would let you come inside  
'cause I was told it would be a crime  
For us to share this love

But love is not a selfish need  
Why if I take it, must I bleed?  
Or is that how it's meant to be  
If only we could live inside my dreams

Then I could love you every night  
Hold you until the morning light  
No one to say what's wrong or right  
The way it has to be

Wish I could love you every night  
Hold you until the morning light

No one to say what's wrong or right  
Oh how I wish, I wish we could be free

Every night I wanna be with you  
Doing all the things we wanna do baby  
A place for only you and me  
To unleash these fantasies  
Oh how I wish I could be free with you  
To do all the things I've dreamed we do baby  
I would give you all the love you need  
Oh how I wish we could be free

Then I could love you every night (my love)  
Hold you until the morning light  
No one to say what's wrong or right (what's wrong or right)  
The way it has to be (the way it has to be)  
Wish I could love you every night (love you every night)  
Hold you until the morning light (the morning light)  
No one to say what's wrong or right (what's wrong or right)  
Oh how I wish, I wish we could be free (The way it has to be)

Then I could love you every night  
Hold you until the morning light  
No one to say what's wrong or right  
The way it has to be  
Wish I could love you every night  
Hold you until the morning light...
