"Neverland"

I knew the lost boys of Neverland
I was a little girl
They taught me all about the otherlife
about the other life
A place where noone gets older and you have the
freedom to do what you like
They never took a wife
They never took a wife

To wow a heart for ever
they drather bring on the nightshade

than to take a stand
So wave goodbye to those pirates and mermaids
We're leaving Neverland
We're leaving Neverland

Now, when you told me you wanted me
that's such an easy line
I want to hear it when the flame cools down
When the flame cools down
Are you out walking the plank of love or courting
fantasy
Jumping inside another warm nightgown
another warm night grown

Insanity and honor
the one will keep you committed

to that wedding band
They want their momma but they wont admit it
We're leaving Neverland

Neverland
