Set in this wave of summer, loving the things you are  
Wiping the smile off all the things I want to do to you  
Pressure inside gets thicker, my head and my damned  
actions  
Drawing a line between her eyes to find some truth in  
here

Around we go, around we go  
Around we go

Around we go, around we go  
Around we go, around we go

Soaking it all with silver, I'm glad we finally met  
This emotion doubles up to make us feel again  
Finding life in substance, in the dark we turn  
Passing round this hold you pulverise, we hide  
ourselves

Around we go

Around we go, around we go  
Around we go, around we go  
Yeah

Around we go, and around we go  
Around we go

Around we go  
Around we go, around we go  
Around we go  
Around we go, around we go  
Around we go  
Around we go, around we go  
Around we go  
Around we go, around we go
