### "Forever Young"

Visit "[Forever Young](#)" on [MotoLyrics.com](https://MotoLyrics.com)

I knew the first time we meet we'd be lovers, last time  
we kissed I was  
blue.

First time you left I discovered, that there won't be  
another like you.

Forever young, love will always be.

Forever young, love will always be.

( Solo 1 )

Every day you were gone I was lonely, each night you  
were gone I was  
blue.

Now darling I'll be with you only, and our love will  
always be true.

Forever young, love will always be.

Forever young, our love will always be.

( Solo 2 ) And to the end I know I will love only you.

I knew the first time we meet we'd be lovers, last time  
we kissed I was  
blue.

The first time you left I discovered, that there won't be  
another like  
you.

Forever young, love will always be.

Forever young, love will always be.
