### "What's Left"

Visit "[What's Left](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Well remember when it seemed so hard  
When did things start to fall apart  
You would call me and we'd talk about it  
But will I have to dream about it yet

[Chorus]

Live along the way, live along the way  
So tell me that you'll stay, tell me that you'll stay  
Live along the way  
Tell me everythings ok and you feel the same

Now it seems like somethings in our way  
How can I make you wanna stay  
It's me and you and I close my eyes  
So take a chance don't say goodbye

[Chorus x2]

Sometimes I wonder where  
Jus where we really are  
How did we find our way  
How did we get this far  
Sometimes I wonder where  
Jus where we really are

Live along the way, live along the way  
So tell me that you'll stay, tell me that you'll stay  
Live along the way  
Tell me everythings ok

[Chorus x3]

\*{Everything that changes  
I'll still feel the same  
And even if your different  
I won't care [x2]}\*

[ \*{ }\*- (plays the same time as chorus )
