Down in flow she starts to go
lead me down into desperation
hard to find your state of mind
i can't seem to see just how it works

i wanna be your life
new variations
on how we can be
just let me come inside
and take your frustrations
and leave them with me

caught in eyes nowhere to hide
i find it hard to even stand up
lost in time watch me unwind
can't seem to find which way is up
I wanna be your life
new variations
on how we can be
just let me come inside
and take your frustrations
and leave them with me

I wanna be your life
new variations
on how we can be
just let me come inside
and take your frustrations
and leave them with me
