"Rings Around The World"

Visit "[Rings Around The World](#)" on MotoLyrics.com

You expose the film in me, we're drawing:
Rings around the World

Sooner or later we will melt together
And draw:
Rings around The World

With all those meteoric stones
And all those sheep they never clone

I am glowing radioactive
We draw
Beams around The World
Wish you could see us when we're at our best now:
We draw Rings around The World
With cans of Post Water in tow
We gonna vaporize your soul

Earth will become Saturn II
With all those Rings around The World
Tetsuo II became me and you
With all those rings around the World
And all those Body Hammer blows
We're drawing Rings around the world
