Ooooooh (X2)

I've been waiting oh so long
For the waves just to carry me on
Spent so many years in fear
That this day wouldn't ever appear
But the shackles today are loose
And we're waiting to happen

Turn it to eleven
Set your sights afar
May the force be within you
I'm following my shoes

Ooooooh (X2)

Wonder woman spin around
Come on up here revive what I found
Spent so many days in fear
That this time would never come near
Now the borders have disappeared
And we're waiting to happen

Turn it to eleven
Set your sights afar
May the force be within you
I'm following my shoes

I'll be near you
I'll be anything you want to
I'll take you all the way
All the way
