Lyrics written by lynn strait
Music written by snot
Produced by ross robinson
Produced at indigo ranch
Guitars: mikey doling, sonny mayo
Bass: tumor fahnestock
Drums: jamie miller
Additional vocals: aimee echo

Well now it seems more then silence
Has been broken
And I think I figured out the dying lie
Yes the truth is that your dialect is half true
Another conversation died alone

This is something we created
Yes my sufferment's
It doesn't have to be a prophecy
We could be both seeking destiny

It's fucking down to us and them
You can decide which on wins
But the time, are you the hunter or the hunted?

Absent (sent)
Sometimes it feels like it's us against them
Absent (sent)
Sometimes it feels like they're angers are justified
And it feels like I'm absent...from your conversation
Just keep on talkin' and you'll sure find out...
You're probably right

Now it seems that there are no easy answers
To the same old questions I've imposed
What does it mean, why would you
Bother asking me?
Like it's something I should know

Just cause they payed me to take it
I guess the money gave me credence

Watch our records sore
As you slow down to buy the accident - so sick

Absent (sent)
Sometimes it feels like it's us against them
Absent (sent)
Sometimes it feels like they're angers are justified
And it feels like I'm absent...from your conversation
Just keep on talkin' and you'll sure find out...
You're probably right

Know that I'll pull your covers bitch
Yes I'm fixin to knock that ego down
Well I might slap your punk ass to the floor
Stupid mother fucker
Nothing but a buster still talkin' shit

Devoid of soul, you dig yourself a hole
Take the fun out, I load the gun for you
Incorrect, cause and effect, you've been sold
Live with the wrong, so ya live in the lies
Take the fun, load the gun, incorrect,
Cause and effect

Absent (sent)
Sometimes it feels like it's us against them
Absent (sent)
Sometimes it feels like they're angers are justified
And it feels like I'm absent...from your conversation
Just keep on talkin' and you'll sure find out...
You're probably right

Yes, yes your probably right
Don't, don't you know your probably right
Yes, yes your probably right
Don't, don't you know your probably right
Yes, yes your probably right

Aaaahhhhh!!
