I'm feeling numb
It's twelve in the mornin
Thinking of your pretty face
Looking at your pictures on your Myspace
Wondering if I'll see ya tommorow
I'll ride to your house on my Haro
When it comes to you nobody relates
I'm feelin luxurious and i don't own an estate
I've been sitting waiting for you
All this shit I've been through
Just tell me you want me too
You tell me its not that easy
Just give me a chance and I'll let you see (let you see)
All that you mean to me..

Lemme get an Encore,
Can i tell you more,
Maybe change your mind,
And forget whos keepin score,
Lend me a hand,
Lemme call you late,
Please just wait,
We could be great,
Just don't let it slip,
Tumble fall and tip,
Kiss your lips,
Tell you goodnight,
And I'll continue to write

Let you see, how I can treat you with respect
Love is something you can't collect
You can only have one
So listen here son
Before you go and think love is just fun
Think before it has become
Trust me you'll find the one, and this song is for mine
When you shake that booty, damn your so fine
But thats not what its about
I wanna be the one to pick you up when your down,
on the ground and feeling lonley,
I'm rapping holy wait what, I want you to sing along

We can sing it all morn
On the phone, yes i want your voice as a ringtone
So I can hear you all the time
I know you'd love this line
So baby girl would you please be mine
Kissing In the rain and walking In the sunshine
Making plans online
Meeting somewhere and always being on time
And i love to rhyme, this time im in the front and hes
behind
So please remember me when your making plans
Yours truley your little man
So give me chance, excuse me miss may i have this
dance?
Ladys first i'm the last one to advance
Cheating isnt a factor, cause your the only one that
matters
So whose your choice?
Phone is fine i wanna here your voice, but your face as
well
No matter what your always gonna be my angel
Made a wish through a conch shell
Guess my wish came true, yesser-oo
Prince Charming has found his Cinderella, and i'll
stand by you and share this umbrella

(x2)
