Album: LIFE ON OTHER PLANETS (2002) Waking up on a Sunday Looking out of the window I've been riding for a night or two I'm so tired another drink will do I'm just living a story There's no one here to rely on Like I heard it on a 45 It's the sign that makes me wonder why Well I can't get up no more Well I can't get up no more Though I tried standing in a forest of reason Though I tried standing in a forest of reason Driving into the sun light There nothing left to delight in It's a sign we ain't got it right I've been thinking about a better life California coming into sight Fading out on the highway There's no one here to rely on It's the sign that makes me wonder why Well I can't get up no more Though I tried standing in a forest of reason Well I can't get up no more Though I tried standing in a forest of reason Murder on the news and blood on the streets again Like a moth to a candle Driven to the naked flame Though I tried standing in a forest of reason Well I can't get up no more Though I tried standing in a forest of reason Well I can't get up no more Standing in a forest of reason Standing in a forest of reason Standing in a forest of reason Standing in a forest of reason Standing in a forest of reason Standing in a forest of reason Standing in a forest of reason
