"This Town"

Visit "[This Town](#)" on MotoLyrics.com

City lights are pointing at me
I close my eyes to see what you see
Smoke cleared it took my breath away

I crossed all seven different oceans
To gather every perfect moment
The brightest stars are falling down

Oh love it's easy
You should believe me

Tonight the land of the lost belongs to me
Running with my eyes shut somewhere in between
In this town
This town
Miles away
But still around

Feeling the sun beneath all the gravity
Finding my way to you till you find me
This town
This town
Never gone back around

City lights are trying to catch me
Open my eyes to see the beauty
Falling stars are coming alive

Oh love it's easy
You should believe me

Tonight the land of the lost belongs to me
Running with my eyes shut somewhere in between
In this town
This town
Miles away but still around

Feeling the sun beneath all the gravity
Finding my way to you till you find me
This town
This town

Never gone back around

Black and white
Blinding lights
Here inside
With me tonight

Tonight the land of the lost belongs to me
Running with my eyes shut somewhere in between
In this town
This town
Miles away but still around

Feeling the sun beneath all the gravity
Finding my way to you till you find me
This town
This town
