Sweating, freezing, itching, bleeding, selfstyled,  
poison  
A lethal meeting, face down, helpless in 48 hrs  
Sickness

Revolting, distorting, and changing for worsend, no  
one will  
Recognize exactly whats wrong. You are denying and  
lying  
No truth - pull up - You've lost you're old friends they'll  
never  
Return again, even when your senses return, again

Sickness, self desired, self assured, with staff  
infection

Nauseous and bloated, your best behind you now,  
irritate  
Amputate, four burning lines  
A blood coated ending to your life's story  
Sickness

Paranoia, schizophrenia, resembling, a picture of  
disabled fear  
The future is pestilence under your skin  
Sickness

As gravity pulls you down and then under, the pain, it  
increases  
With every step you're begging for the ending  
The dragon is sending you - messages from the grim  
reaper's plans

Sweating, freezing, itching till bleeding, self styled  
poison  
A lethal meeting, face down and helpless, terror  
engulfs us  
The sickness that saves us is killing us now
