Watching the world go by,
under the city lights
Watching the world go by,
under the city lights

I'm walking through people I see
This changing world I wanna
Learn to feel the colours of my life

I can still believe in dreams if I wanted to
I'm gonna run and find my way tonight

I watch the world go by these
City lights
Are burning through my veins
This time is all I have I'm
Coming back again
Under the sky at night stars
Shining bright
Reflected in my mind I'm falling
Free

I'm looking for somewhere I've been
Counting the seconds down
Until I find this place I recognise

I can still believe in dreams if I wanted to
I'm gonna run and find my way tonight

I watch the world go by these
City lights
Are burning through my veins
This time is all I have I'm
Coming back again
Under the sky at night stars
Shining bright
Reflected in my mind I'm falling
Free

Watching the world go by, under the city lights

I can still believe in dreams if I wanted to
I'm gonna run and find my way tonight

I watch the world go by these
City lights
Are burning through my veins
This time is all I have I'm
Coming back again
Under the sky at night stars
Shining bright
Reflected in my mind I'm falling
Free

Watching the world go by,
under the city lights
Watching the world go by,
under the city lights
