I can't see were you lie
I can't even here
I just left you beside
I won't search if you disappear.

So please turn on the light's now
please turn on the light's now ..

You trick me with your lies
You make me not wanna hear
You left your friends besides
You won't search if they disappear

So please turn on the light's now
please turn on the light's now ..

Not gonna cry and lose my mind
Not gonna forget my friends and move on
I'm gonna live forever, well that's well done!

Not gonna open my eyes
I'm not in to surprises
So turn on the light's
before my grandma dies! yeah!

So please turn on the light's now

Not gonna cry and lose my mind
Not gonna forget my friends and move on
I'm gonna live forever
well that's well done!

So please turn on the light's now
