"More Than This"

Visit "[More Than This](#)" on MotoLyrics.com

we are walking down the street
of the darkest part of town
and it's raining
raining blood from the skies

and the night is upon us
we're trapped in the darkness
this is what makes us
makes us wanna cry

can't stand it anymore
but we still have to fight
to make it through the night
here we go

we want something more than this
something else and new
and we are searching in ourself
for the way it used to be
we want something more than this
something else and new
and we are searching in ourself
for the passion that we had

Harland where can we find it
the very place to be
just for ourself
and not disturbed by strangers

Julius I don't have a clue
you just have to find
someone with information
maybe you could ask brett

well Harland and Julius
I sure know what to do
let's travel through time

we want something more than this
somethin gelse and new
and we are searching in ourself

for the way it used to be
we want something more than this
something else and new
and we are searching in ourself
for the passion that we had

hey Julius, what are you doing
just shaving my legs you know
you tried out that new razor
no
try my hunting knife
that sure is a sharp knife
julius harland ready to sing
sure we are brett
then let's do this

we want something more than this
something else and new
and we are searching in ourself
for the way it used to be
we want something more than this
something else and new
and we are searching in ourself
for the passion that we had
