eyes closed shut
skin crawling
the all consuming pain pounding from your chest
chew on this i know it hurts
but baby this wont get any better
i promise i wont say anything
just to make you smile
tell me what you want to hear
think again doll, please

take back your money (please)

if i could only find a way
to keep her eyes from filling up
id smile a moment longer
to watch her cheeks turn flush
could bring me to my knees
so think again doll, please

so think again, doll
so think again, doll please

its not the issue of whether shes worth it
theres too many ways that this could happen again

theres a mile between these sheets
and i hope that this hits home
sleep tight
your not trying at all

if i could only find a way
to keep her eyes from filling up
id smile a moment longer
to watch her cheeks turn flush
could bring me to my knees
so think again doll, please
think again

all is fair and loves a war
