(Mickey Newbury)

Here's to your future my darling  
Your health and your happiness too  
And here's to the ends of my world  
You said forever, well here's to forever and you.

Drink up dear the sky just started falling  
Here's to the color so blue  
And here's to the ends of my world  
You said forever, here's to forever and you.

See the stars on the ground watch them fall  
Hear the sound of no sound at all  
But the sound of my heart breaking in two  
You said forever, here's to forever and you.

You said forever, here's to forever and you...
