(Harlan Howard - Shirl Milete)

It's four a.m. and you're just gettin' in
Your first night out I won't ask you where you've been
You're so ashamed your eyes can't meet mine
You've seen that look on me a thousand times.

What makes us do the things we do heaven only knows
We think we have a secret but it always shows
I taught you how to cheat you're doing fine
You've seen that look on me a thousand times.

But I still love you and you still love me
And these are things our eyes should never see
But if we do I know the blame is mine
You've seen that look on me a thousand times.

What makes us do the things we do heaven only knows
We think we have a secret but it always shows
I taught you how to cheat you're doing fine
You've seen that look on me a thousand times.

You've seen that look on me a thousand times...
