I hear a voice
From deep inside
The iron gate
Is open wide
You're still asleep
I start to run
I'm on my way
Towards the sun

I don't wanna hurt you
I don't wanna say goodbye
I will send you my love from the sky
I just wanna hold you
I just wanna feel your touch
But I'll give you my life
Cause I love you too much

The night is cold
And mine alone
It penetrates
My flesh and bone
I carry on
There's no return
This wicked love
Will crash and burn

I don't wanna hurt you
I don't wanna say goodbye
I will send you my love from the sky
I just wanna hold you
I just wanna feel your touch
But I'll give you my life
Cause I love you too much

I'll pick a stone
And paint it blue
For every day
I spent with you

I will rebuild
The fallen sky

And light the moon
Goodbye

I'll kiss the rain
I'll touch the ground
My memory is all around

I don't wanna hurt you
I don't wanna say goodbye
I will send you my love from the sky
I just wanna hold you
I just wanna feel your touch
But I'll give you my life
Cause I love you too much

I don't wanna hurt you
I don't wanna say goodbye
I will send you my love from the sky

I don't wanna hurt you
I don't wanna say goodbye
I will send you my love from the sky
I just wanna hold you
I just wanna feel your touch
But I'll give you my life
Cause I love you too much
