"November Rain"

Visit "[November Rain](#)" on MotoLyrics.com

Nothing is true in the morning
Nothing but pleasure and pain
The feeling the space is between us
Watching the clouds and the rain
Why do you leave me
What does it takes to be sure
It feels like I'm falling
Deeper then ever before
I wanna be with you
In the November rain
I wanna keep us together
I wanna hear your heart
In the November rain
I wanna hold you forever
I know this whole thing is madness
I've been stripped to the bone
Love is a tearful illusion
Turning your heart in to stone
Why do you leave me
I want you under my skin
I will continue

Keeping the fire within

I wanna be with you

In the November rain

I wanna keep us together

I wanna hear your heart

In the November rain

I wanna hold you forever

x2

There is a sweet sense of sadness

I now exist in you mind

What will do when the darkness

Suddenly leaves you behind

Why do you leave me

Why

Why do you leave me

Why

In the November rain

In the November rain

I wanna be with you

In the November rain

I wanna keep us together

I wanna hear your heart

In the November rain

I wanna hold you forever
