Strange love  
Strange love  
A different kind of love  
I know it'll end  
But you are all I want

Speak now  
Speak now  
Or forever hold your breath  
Nothing to fear  
The past will stay behind

Turn the lights down low  
Let me fall inside of you  
When the night grows dark  
Let me know you want me too

My hand  
My hand  
I'll touch you with my hand  
You're slipping through  
Like sand to the sea

So close  
So close  
Much closer than before  
But still so far  
And so you'll always be

My hand  
My hand  
Touch you with my hand
