### "First Night"

Visit "[First Night](#)" on [MotoLyrics.com](http://MotoLyrics.com)

We will remember this first night forever  
After all the songs fade away  
And the stage fades to gray  
And we will remember this first night together  
We'll recall the things that we said  
All the foolish dreams in our head  
On the night we met  
I'm searching your eyes  
Have I seen you somewhere  
You're filling my thoughts with a strange intrigue  
I rivet my glance to your every movement  
I got a notion your love's in a whole different league  
Tell me your name, what's your persuasion  
Your first impression of this whole occasion  
\*And this night shall be the first night  
And first nights were made for love  
I can taste the action in the air tonight  
Hearts are poundin' as the sparks ignite  
And this night shall be remembered  
Long after the music's gone  
And we'll reminisce on the things we said  
And we'll fall in love again\*  
In the air I can sense a strong attraction  
Emotions run wild--are we on the verge?  
We got a hot-line to satisfaction  
I got the answer if you got the urge  
My motor is hot, I'm feeling elation  
You came in the night with the right temptation  
(\* Repeat)  
We will remember this first night forever  
We'll recall the things that we said  
All the foolish dreams in our head  
(\* Repeat)
