We will remember this first night forever  
After all the songs fade away  
And the stage fades to gray

And we will remember this first night together  
We'll recall the things that we said  
All the foolish dreams in our head  
On the night we met

I'm searching your eyes, have I seen you somewhere  
You're filling my thoughts with a strange intrigue  
I rivet my glance to your every movement  
I got a notion your love's in a whole different league

Tell me your name  
What's your persuasion  
Your first impression  
Of this whole occasion

And this night shall be the first night  
And first nights were made for love  
I can taste the action in the air tonight  
Hearts are poundin' as the sparks ignite

And this night shall be remembered  
Long after the music's gone  
And we'll reminisce on the things we said  
And we'll fall in love again

In the air I can sense a strong attraction  
Emotions run wild are we on the verge?  
We got a hot-line to satisfaction  
I got the answer if you got the urge

My motor is hot  
I'm feeling elation  
You came in the night  
With the right temptation

And this night shall be the first night  
And first nights were made for love  
I can taste the action in the air tonight

Hearts are poundin' as the sparks ignite

And this night shall be remembered  
Long after the music's gone  
And we'll reminisce on the things we said  
And we'll fall in love again

We will remember this first night forever  
We'll recall the things that we said  
All the foolish dreams in our head

And this night shall be the first night  
And first nights were made for love  
I can taste the action in the air tonight  
Hearts are poundin' as the sparks ignite

And this night shall be remembered  
Long after the music's gone  
And we'll reminisce on the things we said  
All the painted dreams running through our head  
And we'll fall in love again

On the first night
