

Dusk Til Dawn

"Will It Happen Tonight?"

Visit "[Will It Happen Tonight?](#)" on MotoLyrics.com

I've been watching you tonight
you've been racing around my mind

these eyes are closing dreams tonight
smile but, realise you're in my sight

look at me, now i'm looking the other way
(you, me)
look at me, now i'm looking the other way
(you, me)
look at me, now i'm looking the other way
(you, me)
looking at me tonight

will it happen, will it happen tonight
gotta move and it all feels so right
will it happen, will it happen tonight
rip me out of my soul tonight

i've been watching you tonight
you're all i sense in this obscure light

look at me, now i'm looking the other way
(you, me)
look at me, now i'm looking the other way
(you, me)
look at me, now i'm looking the other way
(you, me)
looking at me tonight

will it happen, will it happen tonight
gotta move and it all feels so right
will it happen, will it happen tonight
rip me out of my soul tonight

you're the one person placed in my sight
move around to what you know feels right
this has to happen, has to happen tonight
rip me out of my soul tonight

look at me, now i'm looking the other way

(you, me)
look at me, now i'm looking the other way
(you, me)
look at me, now i'm looking the other way
(you, me)
look at me, now i'm looking the other way
(you, me)
look at me, now i'm looking the other way
(you, me)
look at me, now i'm looking the other way
(you, me)
looking at me tonight

you turn the other way, down, down, down
you turn the other way, down, down, down
you turn the other way, down, down, down
you turn the other way, down, down, down
(will it happen, will it happen tonight)
you turn the other way, down, down, down
(gotta move and it all feels so right)
you turn the other way, down, down, down
(will it happen, will it happen tonight)
you turn the other way, down, down, down
(rip me out of my soul tonight)

you turn the other way, down, down, down
you turn the other way, down, down, down
you turn the other way, down, down, down
you turn the other way, down, down, down
