Silence is golden
rotten to cores
closing all doors
forgive me

Don't forgive me (x2)
never forgive

I've got the wealth of new ideas(x4)

Eyes are frozen
steely and broken
blind but open
forgive me

Don't forgive me (x2)
Never forgive

I've got the wealth of new ideas(x4)

I've got so many new ideas
I've got so many new ideas
I've got so many new ideas
(show me, show me, all your new ideas!)(x4)

You're making us looking like fools
You're making us looking like fools
You're making us looking like fools
Stop making us
(show me all you're new ideas) (repeat to fade)
