When you're tired of all the shit
on the radio and all the shit
on the television Just come to us

refr:

We are the Evil Sound straight from the underground

We are the fucking noise in your ears
When you miss us
go after with your tears

refr:

We are the Evil Sound straight from the underground

But you shure wont miss uss
You will feel the pain for
The rest of your lives

refr:

We are the Evil Sound straight from the underground
