You're like an accident waiting to happen
I'm like a time-bomb ticking away
Too much obsession's better than nothing
You drive me totally crazy

I'm tired of fighting it, putting up fences
I build the walls, then you break them down
I try but I can't come to my senses
You really know how to play me

'Cause you shake me up when you touch my skin
Leave your name on me like a fingerprint
'Cause I need you, I breathe you, like oxygen
You're saturated, and my skin, my skin

You're like a tattoo I try to cover
You're like an itch that won't go away
You're a mistake I keep running back to
Don't want to jump but you made me

'Cause you shake me up when you touch my skin
Leave your name on me like a fingerprint
'Cause I need you, I breathe you like oxygen
You're saturated and my skin

You got me twisted up, it's true
Deny it till I'm black and blue
It's there no matter what I do
I can't get enough of you

'Cause you shake me up when you touch my skin
Leave your name on me like a fingerprint
'Cause I need you, I breathe you like oxygen
You're saturated

'Cause you shake me up when you touch my skin
Leave your name on me like a fingerprint
'Cause I need you, I breathe you like oxygen
You're saturated and my skin and my skin and my skin
You're saturated and my skin my skin, my skin
