Verse 1:

Right turn fall down
You're there to pick me off the ground
And I can't tell ya how you've turned my world around
You come closer your blue eyes
Have won me over and
I'll never be the same without ya
Here with me through the sun and the rain
I thought you should know that you're my hero

Chorus:

Let's grow old together
With my heart in your hands and your hands holding
mine
We'll face the world together
Cause you are the one I've been waiting to find
It's no secret, so I can't keep it
Cause it's true...
Baby, I love you

Verse 2:

Long day Come home
When you're there I never feel alone
And my cares melt away into your arms again
Your smile takes me
Just awhile to remind myself to breathe
Cause your still the most amazing thing I've ever seen
I thought you should know that you'll always be my hero

Bridge:

Years turn us gray but my heart still jumps when you're
Next to me
I feel so safe cause you're still by my side on those
Cloudy days and
I'm so amazed by... you
