Emotion and thought I've got I've got a lot of it  
For Mr. Blake's sake initiate it if you've caught a bit  
Fresh for the passing a check is for the cashing  
The vibe is still alive 'cause positive is everlasting

Wrinch yourself off recognize and then send it  
If it's of another then discover how to blend it  
Use and spread it out some or lose it and catch another  
one  
10-8 cultivate it if you hate it let the colors run

And bleed 'til you see the hues taking on a new tone  
Negative ain't relative unless it gives a clue to domes  
Chase at a fast pace the taste that makes your face  
smile  
Or waste it and embrace a case of the fake styles

Just keep it going on keep the feeling flowing on  
Lose the crap and make it happen soon you'll see it  
growing long  
And lovely above the soil before the harvest  
Have respect when selecting the buds and leave the  
largest

Take a closer look in the book this time  
Read and see the pictures while you listen to the rhyme  
Think about the summer when the bank got started  
Remember where you were when the vibe was first  
imparted?

"Ooh, yeah. Damn I can't remember"  
I was probably in the squid wasting crazy legal tender  
With Caitlin and Max stealing pens behind my back  
They kept my mind off track but I guess I needed that

Now I'm getting vibes from a thousand one sources  
Looking to trade the flavors chasing a thousand one  
courses  
Outward still in step kid you'd better know  
That if you just tip toe on stage you can't flow

You've got to take a chance dance and shake it kid you  
can't  
Fake it don't be afraid you won't break it  
Make it happen must I say it again?  
And begin to ascend you can't hold back the Mimina-  
Miser  
'Cause I compose the prose in more than an effort to  
devise a  
New way of thinking bringing people back together  
Good tidings on the way just like the days of cloudy  
weather

In the autumn fill the bottom with funky bass-string  
plucks  
And Talbott will keep it tight like Hollywood butt-tucks  
The Five Fingers of Funk as prescribed by Dr. T.  
Pete Miser on the mic I'm strictly L.V.P.

They retaught me how to listen and got me on a  
mission  
Mic ripping to the riffs that they be kicking out the  
kitchen the  
Coalition got stronger the song got longer  
But let me speak my peace before my mind begins to  
wander
