Please add the following song to the lyrics server.
Though the band

is not well-known, the message of the song is an important one.

Artist: Farcemeat (now played by Twitch, as Farcemeat is defunct)

Title: Breeding Kingdom

So many people, so little freedom,

More and more its a breeding kingdom

So many people, so little freedom,

More and more its a breeding kingdom

Children are a market for future industries

They'll make a profit on our miseries

Round and round we go covering the globe

So many people with nowhere to go

Those without a purpose seek their salvation

in their own procreation

God and family its a tradition

A pointless population such a social condition

Government promotes it business stokes it

The flames of reproduction

is our destruction

The flames of reproduction

is our destruction

One good fuck, a bit of bad luck

18 years later 100 thousand bucks

vasectomies are cheap, 150 dollars

is all you'll pay not to hear their hollers

So many people, so little freedom,

More and more its a breeding kingdom

So many people, so little freedom,

More and more its a breeding kingdom

Cutting down the trees building as we do

Doing as we please until we're through

Spending all the energy saved from the sun

To mow our lawns and oil our guns

Going on a gift from millennia

The facade's coming rift

they'll be hysteria

Filling up the air with smog and planes

It's a green house glare it never rains

Future generations will spend their lives

Thinking of inventions for reversing time

One good screw, a bit of bad news

18 years later you don't know what to do

vasectomies are cheap, 150 dollars

is all you'll pay not to hear their hollers

So many people, so little freedom,

More and more its a breeding kingdom

So many people, so little freedom,

More and more its a breeding kingdom
