I've gotta be the one
And you'd better not even doubt
The one who's gonna fire you up
And turn your dreams about
But I heard you got other plans
And I'm telling you really straight
I'm gonna win you anyway now
More sooner than later
There's nowhere to run to baby
Nowhere to hide
I'm following you so close now
You're better off by my side
I'm like lightning so frightening
Lovin' me's a dangerous game
Like lightning it's so frightening
Loving me's a dangerous game
Listen while I talk to you
And you better have eyes to see
You're acting very strange toward me
Now and nothing is for free
I suggest that you hear my voice
And believe me girl it's true
That you're the only one for me babe
And it's me for you
There's nowhere to run to baby
Nowhere to hide
I'm following you so close now
You're better off by my side
I'm like lightning so frightening
Lovin' me's a dangerous game
Like lightning it's so frightening
Loving me's a dangerous game
