

The Sweet "Fade Away"

Visit "[Fade Away](#)" on MotoLyrics.com

Just walking streets at night
On my own, all alone
This time I've gone too far
No-one says 'hey there's that star'
I'm about to fade away

Friends that I had around me
Have left an awful void
This emptiness surrounds me
Now I am unemployed
I'm about to fade away

Once I could light the nights up
With my presence on the stage
I've fallen from the heights
I'm heading for the grave
I'm about to fade away

Just walking streets at night
On my own, all alone
This time I've gone too far
No-one says 'hey there's that star'
I'm about to fade away
