started with a rose  
ended up a millionairess queen  
in your new electric chair  
sweetly sitting there building up steam  
watch your mind little bit  
or you're gonna have to make believe  
flew into LA  
caught a screening of your lifelong dream  
blew it in LA  
now you're desperate to create your own scene  
but watch your mind little bit  
'cause you're headed into the machine  
come to California . . .  
come to California  
baby let it all hang out  
come to California  
tell us what it's all about  
but watch your mind little bit  
'cause the future is beginning now  
come to California . . .  
but watch your mind little bit  
'cause you're headed into the machine  
come to California . . .
