### "Take It While It's Hot"

Visit "[Take It While It's Hot](#)" on [MotoLyrics.com](#)

Take it while it's hot  
Take it while it's hot, give it all you got  
Take it while it's hot

I've always dreamed this was the way that it could be  
Just like a fantasy, your hear along with me  
So now it seems we've slipped into reality  
And it's plain to see this is our destiny  
Feelings I try to hold seem to take control  
I lie awake, my body shakes with just one thought of  
you  
The door is open wide so won't you come inside  
And do those special things that lovers do

Chorus:

Take it while it's hot, I think the time is right  
Take it while it's hot, I want your love tonight  
Give it all you got, don't let this feeling end  
Take it while it's hot, cause it may not come again

Sometimes I'm shy but now I think that you should know  
The deeper that we go, the more my feelings show  
Time passes by just like good things come and go  
So light the candles babe, and I'll make a wish and  
blow  
I love the way you groove, I'm gonna make this move  
It's time to live, I wanna give you what your waiting for  
The lights are pink and low, I think we're good to go  
We're wasting time and I can't wait no more

Chorus (3x)
