[Fes Taylor] I said, I love hip hop, 2Pac, Big Pop' Help
me throw stones in the wristwatch, just watch I linked
with Koch, they used to think not Said that my flow was
cold, soon as you blink, hot Heat up the globe and
stroll, make a pit stop Back to my old hood school, my
homeys they get gwop Saying how long will it take for
you to break through Learn that perfection takes time,
so take full Pain doing logic, now we into Pro Tools
Make true, so good, look at my neck froze to DVD's
mixtapes, moving like we flip weight Started like Ace in
Paid in Full with a big eight Eat, spit, drink straight,
celebrate get cake Like money falling from trees, I
need a bigger rake I'm just grinding, told 'em I would
make it work Haters look at me now, since I'm a new
work [Chorus: Frankie Bells] You will ride, by my side
All I need, your supply It's hard to tell you from afar
There's more, living for you, thought it all I thank you,
thank you, thank you What would I be without, what
would I be without you [Frankie Bells] Give it time, I
woke up wishing I was someone else How did I, I'm
holding wish somebody will feel what I felt My mind,
has been cracked, fell Hold my hands, my body can't
survive [Chorus to fade]
