Baby, I know tonight when I start dreaming
Theres only one thing I will dream
You'll turn around and run to me
Maybe, when I wake up in bed tommorow
My dream will be the truth instead of the sadness I
know

Chorus:

Baby don't go
Please don't separate two hearts that belong together
Don't you know the love I feel for you is going to last
forever
Baby don't go

One day you'll see the troubles we've been having
Are just mistakes we've had to make
To learn to give as well as take
Someday you'll see that this was meant to be love
A fire sent to you and me
That never grows cold

Chorus (2x)

Maybe we'll wake up in bed tommorow
My dream will be the truth instead of the sadness I
know

Chorus (4x)
