Baby you can call on me
Anytime that you feel the need
And I'll be there in a hurry
Givin you the best of me
And baby you know I keep it nice and warm to satisfy
Baby you know that I am always hot for you
And if there's any kinda love that will exemplify
My sweetie I have got that kinda love times two

(Chorus)

Boy I'll do you all night long
Do you anyway you want
I will do you all night long
I wanna please you
Don't wanna tease you

You can melt in my body
And I will slowly melt onto you
Caress your face in my valley
Let me feel the sweetness of you
And baby you know I keep it special each and every
time
I never do nothin once and never quite the same
And baby you know if there is anything you want from
me
I will supply so you can have it your way

(Chorus)

Here's the vibe, there's candlelight
As I undress for you baby
A sip of wine, we take our time
Then I undress you too
I look at you, you look at me
And then we both embrace
And then we just let nature take it's place

(Chorus)
