Come, come stormy weather  
You could make me feel much better  
Come, come and tear my walls down  
Come, come stormy weather  
Come and blow away my shelter  
Come, come and tear my roof of  
Yes tear it down

And make sure to make a good job now so  
We can start from solid ground  
Come bring your fresh air  
Come make us understand  
things that really matter come on

Come, come stormy weather  
You could make me feel much better  
Come, come and tear my walls down  
Come, come my friend  
and set it back again  
Come, come, the way we started  
Yes tear it down

And make sure to make a good job now so  
we can start from solid ground

Come, come Katrina, bring your brother Ivan  
Flood the ocean, put dark clouds in front of the sun  
Let it rain for days, yes let it all wash away  
Don't finish 'til you're done

And make sure to make a good job now  
so we can start from solid ground

Come bring your fresh air  
Come make us understand things that really matter  
come on
