The president got caught getting head

So soon some people will be dead

Iraqi bodies scattered around

By the cluster bombs that land in their barracks and
their homes

They (i.e. U.S. Representatives) get on T.V. and openly
state

That Saddam Hussein should be removed from his
place

If anybody said that about the U.S. president

The U.S. military would rip them a new ass

So where is the real terrorist?

In the Middle East or the U.S.?

So who is the real terrorist?

Is it Saddam Hussein or the U.S. president
