I'm walking around the world and back again now for 7  
years  
but I couldn't find you  
These nights having traveling so far  
But it was no use  
I'm writing curse and most right traces even  
I'm running craft in an airplane  
been looking for you in these brighter and darker  
places  
But it was no use

All this time  
All this time

I'm running to the moon and back again now for 7  
times  
but I couldn't find you  
These nights having traveling so far  
But it was no use

All this time  
You are here  
All this time  
Right beside me right here  
I realize  
I've been so blind  
I realize  
You have been on my love all this time  
Right here

all this time  
right here  
You have been on my love all this time  
Right here  
all this time  
right here  
You have been on my love all this time  
Right here  
all this time  
right here  
You have been on my love all this time

all this time  
You are here  
All this time  
Right beside me right here  
I realize  
I've been so blind  
I realize  
You have been on my love all this time

all this time  
You are here  
All this time  
Right beside me right here  
all this time  
You are here  
All this time  
Right beside me right here

all this time  
all this time

all this time  
You are here  
All this time  
Right beside me right here  
I realize  
I've been so blind  
I realize  
You have been on my love all this time
