"I Lost It"

Visit "[I Lost It](#)" on MotoLyrics.com

I lost it when you spoke
I lost it read your voice
I try to couple my ears
But it's so hard your lips move
so hard your lips move

You held your breath to out
Afraid of what's my card
The sound poured from your mouth
This for I would keep unto
This for I would keep unto

I won't keep real hard your love
Though I could, Though I could
I won't ask you to walk along love
Though you could, Though you could
Do not safety what's on your mind my love
Though you could, Though you could
Do not come other, don't you cut low
Though you could, Though you could

I lost it when you spoke
You held your breath through lungs
Now it's too late to knock it hurt
This is where I cross
This is where I cross

I won't keep real hard your love
Though I could, Though I could
I won't ask you to walk along love
Though you could, Though you could
Do not safety what's on your mind my love
Though you could, Though you could
Do not come other, don't you cut low
Though you could, Though you could

I saw how your lips move
I saw how your lips move
So this is where I pose

I won't keep real hard your love

I try to couple my ears
I try to couple my ears
I saw how your lips move
I saw how your lips move
You held your breath too low
You held your breath too low
I saw how your lips move
So this is where I pose

I won't keep real hard your love
Though I could, Though I could
I won't ask you to walk along love
Though you could, Though you could
Do not safety what's on your mind my love
Though you could, Though you could
Do not come other, don't you cut low
Though you could, Though you could
