Oooh...

The voices of the future

Heard the voices of the past

The voices that were saying

That it would never last

They said that it was evil

Just a passing fad

The music of the devil

It surely must be bad

Aaah..but rock 'n roll lives on and on

And hip-hop, funk, and soul

And the voices of the future

Help to keep the story told

That the barrio keeps getting smaller

Growing up keeps getting harder

And all we've ever tried to say

Is help us find our way< BR>A way...a way...a way  
away...
