The talking animals say
when the moon's so big and yellow
it's called the killer moon

and if you look over your shoulder
it seems like we're being followed
by the killer moon

but we are not afraid of the killer moon

when i look into the sky
see the grey clouds racing by
sends a shiver down my spine
i ain't lying i ain't lying

the talking animals say
when the moon's so big and yellow
it's called the killer moon

but we are not afraid of the killer moon
