Sword Of Light

For many years I travel

to a land that 's miles away

And now the time has come

To find a place for me to stay

But before that time arrive

I have many things to say

Come along and stay behind

We are traveling today...

Many miles away

From the land we step today

There 's a place

Beyond your dreams

And far away

There my father was the ruler

Faced his fate because he signed

For the power

That the world had never seen

A myth comes from the past

Says that death is coming fast

If you use the blade

But that is not the last

So he used the sword of dragons

Took the power in his hands

Made himself a king

-You 're waiting for the end?

"Bridge"

Filled with dragon tears...

There 's the lake of fears...

"Chorus"

The guardians of the lake

Show the path you have to take

The night is long, you have to stay awake

Don't you start the fight

You will break the curse tonight

To the lake you 'll throw the sword...

Of the light

I have seen the flame

Coming hot out of his eyes

As he told me what to do

Before he die

Now I say the same thing to you

You must hear me my good friend

'Cause I 'm tired and tonight

Our trip will end

"Bridge"...

"Chorus"...

Final words of mine

Cause my life runs out of time

You must take the sword

But don't you cross the line

As my father crossed before you

And he carried the last curse

You must throw it or else

You will face the worst

"Bridge"...

"Chorus"...
