Tell me baby, what do you want

Ooh

Just tell me what you like

Midnight candlelight

You and I

Promised to share love for life

But I must have been a fool

'Cause me and you

Don't talk the way we used to

I just need to know

I'm in need of an explanation

'Cause I know that we still can make it right

With no words love is complication

Do you love me baby

Chorus:

Just tell me what you like

What you want

Tell me what you like now

Tell me what you like

What you need

Tell me what you like baby

Remember when we played  
Run through the rain  
Love was laughter love was right  
I never shed a tear  
When you were near  
Passion was never ending yeah  
Then you hurt me so  
But I feel only pure compassion  
'Cause I know that we still can make it right  
With no words love is complication  
Do you love me baby  
Chorus  
Tell me what you like  
You know and I know we can make it  
Give me a reason just tell me what you like  
I don't want us to put our trust into time  
I just need to know  
Tell me baby, what do you want  
Ooh, got to tell me  
I need to know  
Tell me now  
Tell me baby what do you need  
Ooh, got to tell me  
Chorus
