Lisa, you are the shelter for my soul

Lisa, you heal my heart when I lose control

As I let my fingers trace

Each time worn line upon your face

I know only love creates a masterpiece like you

I know it's true!

Lisa, Lisa, say you're gonna live forever

Lisa, Lisa, never gonna say goodbye

Only you know who I am

Only you really understand

Nothing's gonna take you away!

Lisa, I know we live in different worlds

Lisa, but I will always be your little girl

And on a stormy night you built a rainbow to my door

I'll always remember you!

Lisa, Lisa, say you're gonna live forever

Lisa, Lisa, we're never gonna say goodbye

Only you know who I am

Only you really understand

Nothing's gonna take you away from me
