Never before had I felt so safe  
I'd open my eyes to see you lying there  
So insecure I felt just like a fake  
How could anybody really care  
Care for me care to see  
I don't like you knowing where I started  
Chorus

There was a time I was a lonely highway  
One of the lights they pass like ghost who came up  
close and stayed.  
There was a time you always had the answers  
Your words spun like dancers with my pride I pushed  
your words away

Regardless of where I was and what I said  
Look what this front of mine had led me to  
Now I can see just how far how far you have gone  
I understand you would have taken me with you  
And you knew all along you were in the right and I was  
wrong

Chorus again

The past has such a hold on me  
So where do I belong now  
If I could go back there and do it all again

Chorus
